

Series Title: Climate of the Past 20th anniversary webinar series

Event dates: June 2025 to April 2026

To mark its 20th anniversary, *Climate of the Past*, an interactive journal of the European geosciences Union, is launching a special webinar series celebrating two decades of leading paleoclimate science.

Event description:

Each webinar will emphasize the journal's scientific diversity and impact, featuring **two invited talks** of 30' from leading researchers across different areas of paleoclimate science. Talks will be followed by a live 30' **Q&A session**, allowing for discussion and engagement with the broader community.

Session planned (exact dates, times and speakers to be announced later):

1. Abrupt Climate Change and Tipping Points, 11 June 2025, 16:00 CEST
2. High-Resolution Paleoclimate Data, July 2025
3. Greenhouse Gases and Climate Sensitivity, September 2025
4. Paleoclimate Modeling and Data Assimilation, October 2025
5. Impact of Past Climate Change on Ecosystems and Human Societies, November 2025
6. Ocean Circulation and Climate Change, December 2025
7. Polar Climate History, January 2026
8. Monsoon Variability, February 2026
9. Volcanism and Climate, March 2026
10. Paleoclimate of Extreme Events, April 2026
